The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP409241427A in view of EP 1 006 007.

Rejection is maintained for reason of record with following response.

Comparison must be based on the closest prior art, and JP teaches a tread rubber composition comprising a diene-based rubber, 0.5-40 pts.wt. of silicone resin particle and 30-80 pts.wt. of carbon black in abstract. Aluminum hydroxide is optional component in the instant invention. Thus, comparison of the above composition and the above composition plus glass fibers is needed, and applicant failed to show such comparison in the specification. Also, Ex. 1-3 and Comp. Ex. 1 of table 1 cannot be compared fairly since Ex. 1-3 contain an additional component, Highlite and Suprex. The same reasoning is applied to Ex. 4 and Prior Art of table 2.

Comparison of Ex. 4 of the specification and table 2 of 1.132 Declaration is convincing, but the scope of examples is broader than that of claims.

Claims 1, 2, 5, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohta et al (US 6,489,389 or EP 0 697 432) or EP 0 945 482 in view of EP 1 006 007.

Rejection is maintained for reason of record with following response.

Comparison of Ex. 1 of table 1 of the specification and table 1 of 1.132

Declaration is inconclusive since Ex. 1 has a better performance on ice, but table 1 of 1.132 Declaration has a better abrasion resistance. Also, the scope of examples is broader than that of claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
